Attention: Willard V. Foreman

Dear Mr. Foreman:

The injection of $\text{Pu } 239$ was done on the 16th of July at 3:11 P. M. and this note confirms my telegram to that effect.

Miss Silberstein checked the solution that we need. The subject actually received 0.45 cc. Analysis indicated that the concentration of the injected material was 12.1 gamma/cc, so that we assume that 5.45 gamma were actually injected.

Very sincerely yours,

Dr. Samuel H. Barrett
